

Session Program

15-20 Mar 2026

Solar Orbiter - IRIS - ADITYA - Joint Workshop

Dynamos, production and the evolution of the magnetic field

Berlin, Harnack Haus

Monday 16 March

09:15

Dynamos, production and the evolution of the magnetic field

Session | Location: Berlin, Harnack Haus

09:15-09:35 **The small-scale solar dynamo**

Speaker

Matthias Rempel

09:35-09:50

**Nearly continuous monitoring of active region nesting with Solar Orbiter:
Towards long-term forecasting of solar activity**

Speaker

Adam Finley

09:50-10:05

**Studying Solar Hemispheric Magnetic Flux variations using Synoptic Maps and SO/
PHI Far-Side Observations**

Speaker

Hanna Strecker

10:05-10:35

online - The Key Role of the Sun's Polar and Surface Fields in the Global Dynamo

Speaker

Jie Jiang

10:35
